15-12

Servicing Hints for Generator when Removed from the Vehicle

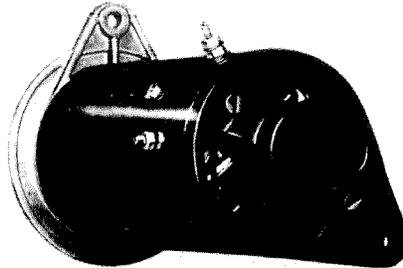

I. Models 180, 180 a, 180 b, 180 D, 180 Db, 190 D, 190 Db, 190 SL, 220 a, 219, 220 S

The servicing hints given for the generator on Model 190 apply.

II. Model 220 SE

Generator LJ/GG 240/12-2400 R 8 has new brush holders which are offset from the center and are no longer fixed to the commutator bearing but to the armature housing. As a result the carbon brushes are larger. Furthermore the new brush holders reduce the risk of dirty and sticking carbons.

For generator servicing see Job No. 15-13.
