

Job Aid for the 190 SL's

Color Selections in Detailing to Concours

This Job Aid is a compilation of research from many sources. The colors selected are based upon the 190SL Newsletter, (all years), various technical sessions, research into original 190's, and various discussions with knowledgeable vendors and members. Your comments, suggestions, and additions/changes are always appreciated.

The intent here is not to set a standard, but rather, share with the reader our experiences. Color at your own risk.

I have organized the material as a table, using the Mercedes-Benz Type 190SL – Spare Parts List, Edition D as my point of reference for the item number and description. If the part was mentioned in a Newsletter article, I included that page number for a cross-reference.
